

Tejas Pingale

Full-Stack Developer • AI Engineer • Forward Deployed Engineer

+91 9356800589 | tejaspingale4@gmail.com | [LinkedIn](#) | [GitHub](#) | Pune

PROFESSIONAL SUMMARY

Full-Stack Engineer with 1+ year of production experience in React/Next.js, Java/Spring Boot, headless CMS, and enterprise API integration. At Contentstack, leading a .NET Framework-to-.NET 10 modernization and 14+ third-party integrations (Azure AD B2C, OAuth/OIDC, Google Maps). Builds applied AI solutions, including a fine-tuned CMS support chatbot. Smart India Hackathon 2023 winner (All-India Rank 1, out of 200+ competing teams). Seeking Full-Stack, AI Engineering, or Forward Deployed Engineer roles.

EDUCATION

B.Tech. Computer Engineering — MIT Academy of Engineering, Pune

2021–2025

CGPA: 9.11 / 10

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), Typescript, Python, SQL, HTML5, CSS3
- **Frontend & Backend:** React.js, Next.js, Angular, Tailwind CSS, PWA, Node.js, Spring Boot, Flask, REST APIs, Microservices
- **CMS & Integration:** Contentstack, Salesforce API, API Orchestration, Data Mapping, Headless CMS, Middleware
- **Cloud & Enterprise:** AWS (EC2, S3), Azure AD B2C, OAuth/OIDC, Google Cloud, Google Tag Manager, Legacy Modernization
- **AI, Data & Tools:** Prompt Engineering, NLP, Computer Vision, Model Fine-Tuning, MongoDB, MySQL, Git, Postman, CI/CD, Agile/DevOps, AI-assisted Development

EXPERIENCE

Associate Software Engineer

Jan 2025 – Present

Contentstack • Pune, India

- Drive an enterprise-scale legacy modernization initiative (Winn-Dixie), migrating application logic from .NET Framework 4.8 to .NET 10 and re-platforming content onto Contentstack across 20+ page templates.
- Own integration and troubleshooting for 14+ third-party systems, including Azure AD B2C, OAuth/OIDC, Google Maps, Store Locator, Google Tag Manager, digital coupons, and Azure Monitoring, cutting recurring integration defects by 30%.
- Engineered reusable React and Next.js components for BayFC, connecting Contentstack, ticket booking, match schedules, Instagram, and Google Tag Manager, reducing component duplication across 15+ pages while resolving cross-layer data-flow issues.
- Delivered a Progressive Web App (PWA) on Contentstack CMS using Delivery/Management SDKs and APIs, mapping CMS data to frontend models and UI for 10+ content types.
- Connected Salesforce APIs for product data and built a Contentstack override/fallback mechanism, enabling business-driven personalization for 20+ merchandising rules.
- Designed and fine-tuned an AI-powered CMS support chatbot using pretrained models, prompt engineering, and domain-specific knowledge, cutting average troubleshooting time by 40%.
- Perform end-to-end root-cause analysis across frontend, backend, CMS, and third-party API layers, resolving 15+ business-critical integration issues per quarter.

Machine Learning Intern

Feb 2024 – Apr 2024

Eumentis • Pune, India

- Built a food image classification system using OpenCV and deep learning, applying image preprocessing and classification techniques to identify 15+ food categories with 88% accuracy.
- Created and connected Flask REST APIs with a React.js frontend, enabling real-time predictions with sub-2-second latency.
- Worked across the ML and full-stack development lifecycle, spanning model integration, MySQL connectivity, API development, and application testing.

Full-Stack Developer

Feb 2024 – Mar 2024

Smiths Detection • Pune, India

- Built a real-time CCTV surveillance system using AI/ML and computer vision to detect knives and flag potential violent activity in public spaces, achieving 90% detection accuracy.
- Implemented real-time object detection and activity monitoring, automating analysis across 10+ camera feeds for safety and security applications.
- Won 1st Prize (out of 50+ teams) at the Smiths Detection Hackathon for an innovative, real-world AI-based surveillance solution.

Full-Stack Developer

Aug 2023 – Dec 2023

Smart India Hackathon • Dindigul, India

- Built a solution for a Ministry of Railways problem statement as part of a 6-member multidisciplinary team, covering multilingual translation, chatbot support, and real-time passenger notifications.
- Achieved All-India Rank 1 at Smart India Hackathon 2023, outperforming 200+ competing teams nationwide.

KEY PROJECTS

Winn-Dixie – Enterprise Application Modernization & CMS Migration Jul 2026 – Aug 2026

- Modernized an enterprise application from .NET Framework 4.8 to .NET 10, integrating modern frontend functionality with a headless Contentstack CMS.
- Migrated and mapped legacy CMS functionality to Contentstack using SDKs and APIs, transforming structured JSON data into frontend models and 25+ reusable UI components.
- Integrated and supported 14+ enterprise and third-party services, including Azure AD B2C, Google Maps, Store Locator, Eagle Eye, Marcatus, Zembula, Digital Coupons, Azure API Manager, and Azure Monitor.
- Led end-to-end integration analysis and root-cause troubleshooting across CMS, APIs, authentication, middleware, third-party services, environment configurations, and frontend rendering, reducing escaped defects by 25%.

BayFC – Full-Stack Web Application & Contentstack Integration Apr 2026 – Jun 2026

- Built reusable and responsive web components using React and Next.js, powering 12+ dynamic content modules and business functionality.
- Integrated Contentstack Delivery and Management SDKs/APIs to fetch, manage, transform, and map CMS data into frontend components.
- Implemented Next.js middleware and backend logic to orchestrate data between Contentstack, third-party APIs, ticketing services, and the frontend.
- Connected ticketing, match schedules, Instagram, and Google Tag Manager services while resolving API, CMS, data-mapping, and frontend rendering issues.

AI-Powered CMS Healthcheck Chatbot – Intelligent Technical Support Jan 2026 – Mar 2026

- Designed and built an AI-powered chatbot to analyze and respond to Contentstack CMS-related technical queries and troubleshooting scenarios.
- Customized and fine-tuned pre-trained AI/ML models with domain-specific CMS knowledge, improving response relevance by 35%.
- Applied prompt engineering and contextual prompting techniques to guide the model toward structured problem analysis instead of generic responses.
- Evaluated chatbot responses against 50+ real-world CMS scenarios and iteratively refined prompts, training inputs, and contextual knowledge to raise troubleshooting accuracy to 85%.

PWA Kit – Headless Commerce & Content Integration Platform May 2025 – Aug 2025

- Built a responsive Progressive Web Application using React, shipping reusable and scalable frontend components for dynamic commerce experiences.
- Integrated Contentstack CMS using SDKs and REST APIs to fetch, transform, and map structured JSON content into frontend-specific models and UI components.
- Connected Salesforce APIs to retrieve product and product-detail data, enabling seamless data orchestration across Salesforce and Contentstack.
- Implemented a CMS-driven fallback and override mechanism, allowing Contentstack content to supplement or override Salesforce data for business-driven personalization and resilient data rendering.

OpenCV Food Classification Feb 2024 – Apr 2024

- Built a food image classification system (OpenCV, deep learning, Flask, React.js, MongoDB) to identify and categorize 20+ food items with 88% accuracy.

Criminal Detection & Knife Attack Detection – AI/ML Based Project Feb 2024 – Mar 2024

- Built a real-time AI/ML surveillance system (deep learning, computer vision, Flask, React.js, MongoDB Atlas) to detect knives and suspicious activity, as a 6-member team.

Arriva – AI-Powered Railway Travel Platform Aug 2023 – Dec 2023

- Built a comprehensive railway travel platform (React.js, NLP, microservices) featuring a multilingual translation engine, AI chatbot, and real-time passenger notifications.
- Combined geospatial services and a secure, scalable microservices architecture with DevOps practices to support intelligent passenger assistance.

CERTIFICATIONS & AWARDS

- AWS Cloud Foundation
- Google Cloud Career Path Profile Certification
- Smart India Hackathon 2023 – Winner (All-India Rank 1)
- Smiths Detection Hackathon – Winner
- Vois International Hackathon – Top 30 Finalist
